EDUCATION

The Ohio State University

Expected May 2027

B.S. in Computer Science and Engineering | Specialization: Artificial Intelligence

GPA: 3.9/4.0

Courses: Systems Programming, Operating Systems, Computer Networking, Distributed Systems, Software Engineering

EXPERIENCE

WillowTree, A TELUS Digital Company

Columbus, OH

Software Engineering Intern | iOS + Backend (Swift, C#, GraphQL)

May 2025 – Aug 2025

- Integrated live Radar SDK in Swift across 4,500+ stores to boost real-time location accuracy and app stability
- Spearheaded Favorite Order feature in native Swift, improving repeat order flow by 30% for 41M+ users
- Refactored GraphQL resolvers in C# to handle 497K+ daily requests while maintaining strict data consistency
- Architected asynchronous backend pipelines to process high-volume event data with low-latency response times

Lighthouse Avionics

Hilliard, OH

Software Development Intern | Full-Stack (Vue.js, Django, Python)

May 2024 – Aug 2024

- Developed an API-powered query page, accelerating detection and classification by 84% using Vue and Django
- Designed a responsive, low-latency UI using WebSocket and CSRF token handling for secure communication
- Reduced system overheating by 60% through a multi-mode temperature control system with automated logic
- Optimized real-time data streaming between sensors and dashboards to ensure zero-lag positional monitoring

PROJECTS

Future Map (GenAI Infrastructure) | React, Node.js, TypeScript, MongoDB, OpenAI

Mar 2025

- Built an AI-powered platform serving 3.7M+ students by integrating scalable services with GenAI workflows
- Engineered a recommendation engine using Node.js and MongoDB to generate five dynamic content modules
- Integrated LinkedIn API and REST endpoints to boost career-match accuracy by 35% via intelligent caching

Open Path (JPMorgan Code for Good) | Django, React, MongoDB, TypeScript

Nov 2025

- Built a full-stack policy platform for Modern States, serving 700K+ learners and 3K+ partner colleges
- Optimized frontend performance by 40% using React + TypeScript, Tailwind UI, and Google Maps APIs
- Developed Django REST APIs and MongoDB Atlas pipelines for real-time synchronization and secure access

Core Commerce | Java (Spring Boot), React, TypeScript, PostgreSQL, AWS S3

June 2025

- Built an e-commerce platform with RESTful APIs supporting inventory tracking across 10+ product categories
- Architected resilient infrastructure with Docker, ensuring scalable support for 1,000+ digital assets via S3
- Designed relational schemas and optimized SQL queries to handle complex product relationship mappings

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C#, Swift, SQL, HTML, CSS

Distributed/Cloud: AWS, Microservices, Docker, CI/CD, WebSockets, GraphQL, REST APIs, Linux

Systems/Tools: React, Node.js, Django, Spring Boot, MongoDB, PostgreSQL, Git, Jira, System Design

LEADERSHIP & ACTIVITIES

Big Data Analytics Association

Jan 2024 – Present

Project Leader

- Led analysis of 200K+ traffic stop records to uncover racial disparities using Python, Pandas, and Matplotlib
- Built interactive dashboards that simplified statistical insights and promoted data-driven equity discussions
- Translated raw data trends into actionable policy insights during technical presentations to diverse stakeholders
